NISHANT KUMAR

APPLICATION SUPPORT ENGINEER | TECHNICAL SUPPORT | L1 PRODUCTION SUPPORT

nishantkumar27203@gmail.com | +91-8668808421 | linkedin/in/nishant-kumar-272 | github/Nishant27203

PROFESSIONAL SUMMARY

MCA graduate (2026) with practical project experience in Application Support, IT Operations, System Monitoring, and Technical Troubleshooting. Knowledge of SQL, PostgreSQL, Linux, Windows, TCP/IP, DNS, DHCP, and REST APIs. Developed projects involving incident management, ticket handling, SLA monitoring, application health checks, and endpoint diagnostics. Interested in resolving technical issues and ensuring smooth application operations. Seeking an entry-level Application Support Engineer or L1 Production Support role.

TECHNICAL SKILLS

Application / IT Support: Application troubleshooting, technical issue triage, incident and ticket management, SLA monitoring, issue prioritization, escalation, resolution notes, knowledge base
Systems & Networking: Windows desktop troubleshooting, Linux fundamentals, Bash / shell fundamentals, TCP/IP, DNS, DHCP, HTTP/HTTPS, client-server communication
Monitoring & Operations: Endpoint health monitoring, application health checks, log monitoring fundamentals, CPU / memory / disk checks, DNS / ping / TCP diagnostics, runbook documentation
Databases & APIs: SQL, PostgreSQL, MySQL, SQLite, Microsoft SQL Server, REST APIs, API health checks, database querying and validation
Tools & Professional Skills: Python, Node.js, Git, GitHub, analytical problem-solving, clear verbal and written communication, active listening, customer focus, team collaboration

TECHNICAL PROJECTS

NEXUS IT Command Center – IT Operations & Monitoring Platform | GitHub **Jul 2026 – Sep 2026**
React, Node.js, Express.js, SQLite, WebSocket, systeminformation

- Developed an IT operations MVP covering incident coordination, endpoint visibility, application health checks, support knowledge, and operational reporting.
- Implemented SLA-backed incident lifecycle, problem / change records, audit history, and degraded-application checks that can raise incidents.
- Added an authorized endpoint agent and read-only diagnostics for CPU, memory, disk, network interfaces, DNS, ping, TCP connectivity, processes, and services.

Enterprise IT Help Desk & Ticket Management System | GitHub **Apr 2026 – Jun 2026**
React, Node.js, Express.js, PostgreSQL

- Built a role-based support portal for employee ticket creation, technician assignment, incident tracking, and ticket resolution.
- Implemented L1 / L2 / L3 escalation, adjustable response and resolution SLAs, scheduled SLA monitoring, and ticket activity history.
- Developed REST APIs, PostgreSQL data models, role-based access controls, resolution notes, and a searchable IT knowledge base.

Distributed Log Monitoring & Alerting System | GitHub **Nov 2025 – Feb 2026**
TypeScript, Fastify, Redis Streams, Elasticsearch, PostgreSQL, Docker

- Implemented core log-ingestion and worker-processing components to receive, queue, process, and index application log events.
- Added PostgreSQL-based operational metrics and threshold-alerting foundations; analytics API and dashboard integration remain in progress.

EDUCATION

Lovely Professional University, Punjab **Aug 2024 – Jul 2026**
Master of Computer Applications (MCA)

Chaudhary Charan Singh University, Uttar Pradesh **Apr 2021 – Jul 2024**
Bachelor of Computer Applications (BCA)

Kendriya Vidyalaya, Bulandshahr **Apr 2020 – Mar 2021**
Intermediate (12th Grade)

CERTIFICATIONS

Introduction to Linux (LFS101) – The Linux Foundation | Operating Systems Basics – Cisco Networking Academy
SQL Programming Essentials – Udemy
